SafePath™

SafePath Family provides location services and parental controls to keep families connected and protected.

Real-time Location
Locate your family on your smartphone or the web in real time.

Geo-Fencing
Create safety zones for family members.

Notifications
Receive alerts when family members arrive or leave designated areas.

Panic Alert
Send an emergency alert with your location to all family members.

Parental Controls
Restrict calls to trusted numbers and app usage to certain times of the day.

Content Protection
Filter out inappropriate content on web browsers and block installation of new apps on children's phones.

Phone Security
Find, ring, lock and wipe any family phone if lost or stolen.

Wearables
Keep children and elderly relatives safe with GPS wristwatches.

Keep Everyone Safe

HELP YOUR SUBSCRIBERS PROTECT AND LOCATE THEIR LOVED ONES WHENEVER, WHEREVER

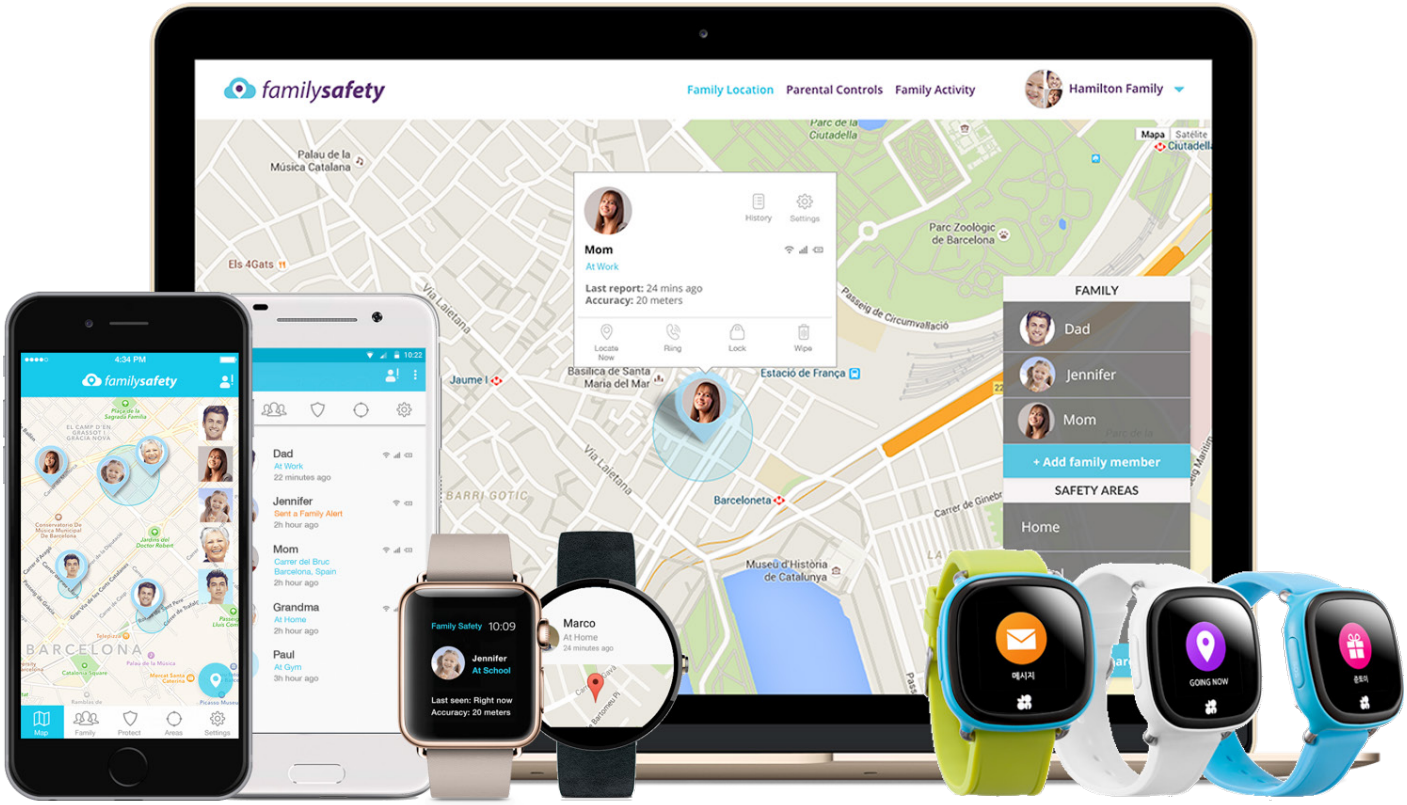
SafePath™

SafePath Family provides easy-to-use mobile and web tools to keep family members safe at all times. It supports Android and iOS devices, as well as GPS wearables, and is accessible from any PC via web browser.



For mobile operators, the SafePath Platform offers:

- **White-label apps that can be custom branded for the operator**
- **A scalable, cloud-based platform based on open standards**
- **Quick implementation with Telco-grade APIs via web services layer**
- **Streamlined integration with back-end billing and provisioning systems**
- **Reduced risk with quick-go-to-market and minimal cost of ownership**
- **Full support for language localization and UTF-8 character encoding**
