

SafePath[®] FAMILY

SafePath[®] Family provides location services and parental controls to keep families connected and protected.

Real-time Location

Locate your family on your smartphone or the web in real time.

Geo-Fencing

Create safety zones for family members.

Notifications

Receive alerts when family members arrive or leave designated areas.

Family Alert

Send an emergency alert with your location to all family members.

Parental Controls

Restrict calls to trusted numbers and app usage to certain times of the day.

Content Protection

Filter out inappropriate content on web browsers and block installation of new apps on children's phones.

Phone Security

Find, ring, lock and wipe any family phone if lost or stolen.

Wearables

Keep children and elderly relatives safe with GPS wristwatches.

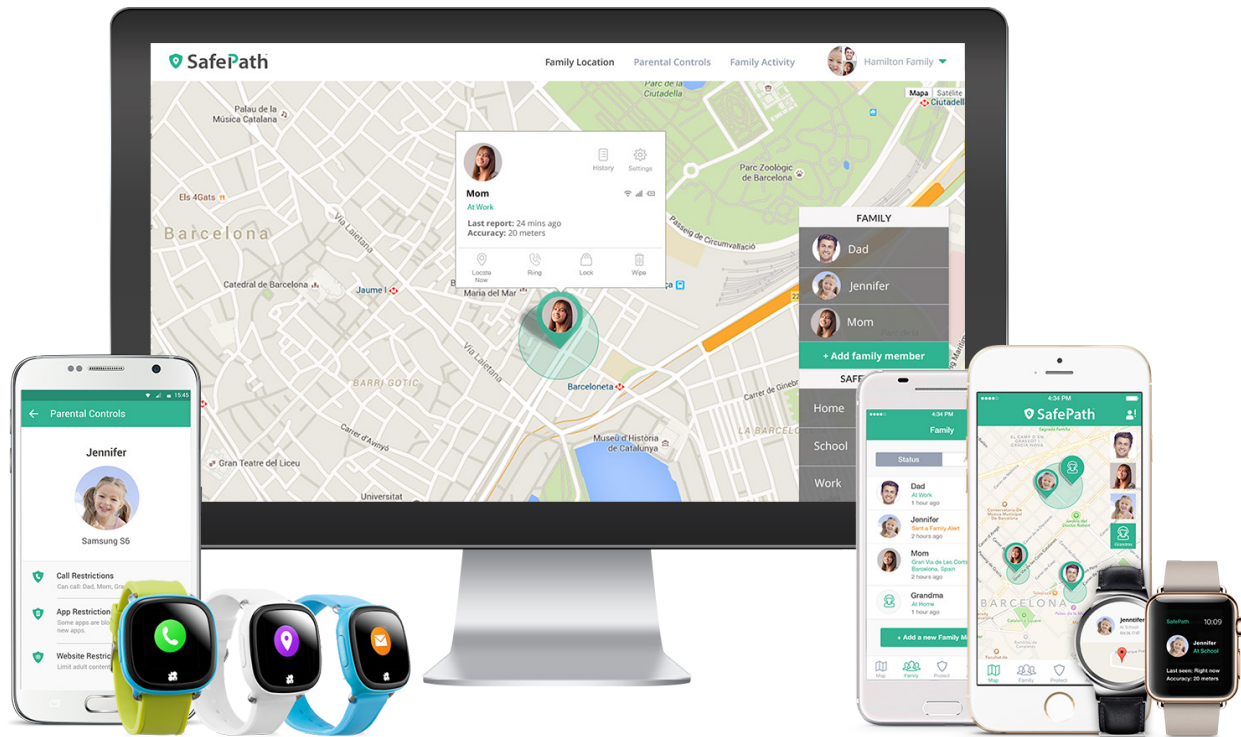

Keep Everyone Safe

HELP YOUR SUBSCRIBERS PROTECT AND LOCATE
THEIR LOVED ONES **WHENEVER, WHEREVER**

SMITHMICRO
SOFTWARE

SafePath® Family provides easy-to-use mobile and web tools to keep family members safe at all times. It supports Android and iOS devices, as well as GPS wearables, and is accessible from any PC via web browser.

For mobile operators, the SafePath® Platform offers:

- A white-label solution that can be custom-branded for the operator
- Total cross-platform functionality for Android, iOS, and wearable devices
- A scalable, cloud-based platform based on open standards
- Quick implementation with Telco-grade APIs via web services layer
- Streamlined integration with back-end billing and provisioning systems
- Reduced risk with quick go-to-market and minimal cost of ownership
- Full support for language localization and UTF-8 character encoding
