

IoT Intelligence Platform

SIMPLIFYING THE INTERNET OF EVERYTHING

FOG ARCHITECTURE

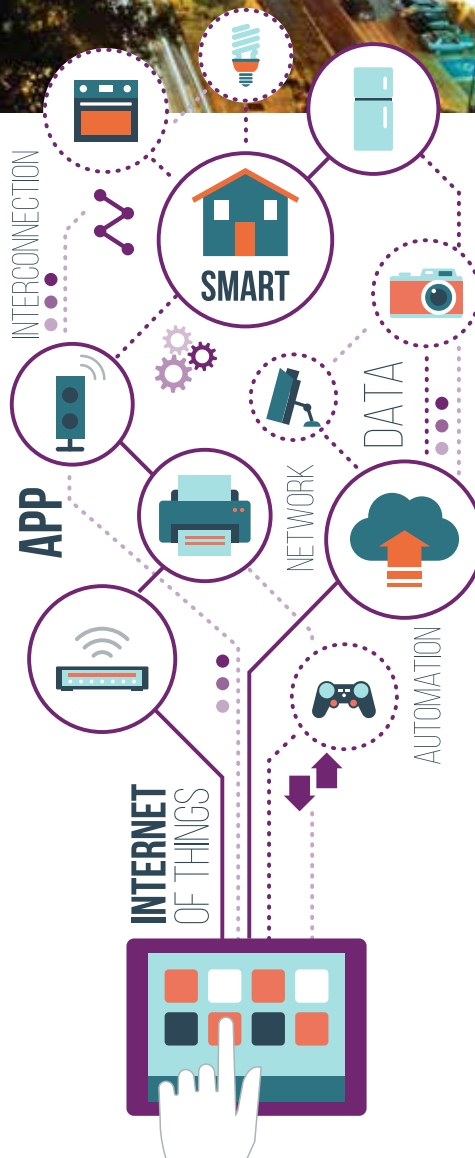

Bring intelligence from the cloud to the edge.

SIMPLIFY SENSOR MANAGEMENT

Simplify the management of large device populations with dynamic device groups.

ACTIONABLE BUSINESS INTELLIGENCE

Take immediate action based on in-field sensor data.

SCALABILITY

Manage millions of OMA LwM2M and DM clients with a single server.

SECURE YOUR SENSITIVE DATA

Send sensitive data directly to a third-party server.

RAPID GO-TO-MARKET

Accelerate solution deployments with a carrier-compliant platform.

ENHANCE THE VALUE OF YOUR IOT PROJECT

Bring intelligence from the cloud to each edge device

Base business decisions on real-time in-field data.

Choose an experienced partner with understanding of IoT ecosystem architecture.

Simplify the deployment process with proven products.

SUPPORT ANY PLATFORM

LwM2M client runs on any platform supporting POSIX compliance library.

RESOURCE-EFFICIENT, SECURE CLIENT

LwM2M, DM & P2M compliant; compact on-device footprint.

AVOID INCOMPATIBILITY

Proven interoperability with many available IoT solutions.

CARRIER-GRADE SECURITY

Encrypted data storage and transmission including direct-to-your-server transmission.

RAPID THIRD-PARTY INTEGRATION

Full set of client and server APIs for rapid integration and development.

PATENTED FOTA TECHNOLOGY

Patented DE/UA technology supports binary and file system updates.

QuickLink® IoT brings intelligence from the cloud to the edge, enhancing the value of your IoT project and simplifying deployments on carrier networks.
